Sensor Weather Shield

The Sensor Weather Shield is designed to protect your outdoor sensors from rain and snow. This shield will offer limited protection from the sun's heat.

- Temperature sensor
- Temperature/Humidity sensor
- Probe sensor

Model: 925-1418
DC: 021118

Holes for mounting screws

Slots for zip ties

Holes for mounting screws

Sensor

Velcro Tape

Upright

Base

If you have a sensor with a probe wire, there is a hole for the probe to exit.
Note: Sensor and probe are not included

INSERT SENSOR (not included)

- Twist the cover clockwise to remove the base.
- Attach the Velcro tape to the sensor and to the upright on the base. This keeps the sensor from tipping.
- Alternately, secure the sensor with a zip tie.
- With a probe sensor, be sure the probe wire fits through the round hole in the base.
- Place cover over sensor and base. Twist counter clockwise to lock into place. Sensor must fit entirely in the sensor shield to be protected.
- Mount the sensor shield so that the sensor is in range of the display.

MOUNT SENSOR SHIELD

Mount to a flat surface:
- Twist the cover clockwise to remove the base.
- Place one long screw through the center hole of the base.
- Tighten until the head of the screw is flat with the base. Do not over tighten.

Mount to a wall or post:
- Slide the mounting bracket down and remove from the cover.
- Take note of the UP ARROW on the back of the bracket.
- Find a shaded location and attach the bracket (arrow UP) with the four screws (included), or with the two zip ties (included).
  Note: Allow room to slide cover onto bracket.
- Slide the shield down onto the bracket.

DIMENSIONS: 7.00" H x 3.73" W x 3.98" D (177.8 x 94.74 x 101.9 mm)
